EDUCATION

SIDDHARTHA INSTITUTE OF TECHNOLOGY AND SCIENCES
BTech in Computer Science
June 2018 | August 2022
CGPA 6.9 / 10

KAKATIYA JUNIOR COLLEGE
XII Standard
June 2015 | May 2018
57.6 / 100

ST. MARY HIGH SCHOOL
X Standard
June 2014 | April 2015
CGPA 9.0 / 10

SKILLS

PROGRAMMING LANGUAGE
• Java

JAVA FRAMEWORKS
• Spring Boot with Spring MVC, JPA / Hibernate, Microservices, Spring Security, RESTful APIs, Swagger, Maven, Lombok.

DATABASE
• MySQL (with JDBC connectivity)
• PostgreSQL

WEB | GUI
• SwaggerUI • JavaSwing
• HTML5 • CSS3 • Bootstrap

DEVELOPER TOOLS
• Git • Github • IntelliJ • Apache NetBeans • DBeaver • Postman

OTHERS
• Data Structures and Algorithms
• Operating Systems • OOPs
• Computer Networks • DBMS

INTERESTS

• Puzzle solving
• Gaming
• Cooking
• Occasional Chess Player

PROJECTS

FLIPMART | Source Code
May 2023 – May 2023 | Spring Boot Application (Back-end)
- Developed a robust e-commerce platform using Spring Boot, which exposes a set of RESTful APIs that will allow communication with the front-end or client-side and enables CRUD operations.
- Entities like Order, Seller, Customer, Cart, Product with their relations have been integrated into a MySQL database system to store and retrieve data.
- Data Transfer between layers like Controller, Service, Repository etc are handled using DTOs to enhance security and reusability of components.
- Postman used for testing APIs. Swagger used for API Documentation. Email Notification enabled.

DOSIFY | Source Code
May 2023 – May 2023 | Spring Boot Application (Back-end)
- Developed a Covid Vaccine Booking System using using the Spring Boot framework which exposes a set of RESTful APIs that will allow communication with the front-end or client-side and enables CRUD operations.
- Entities like Center, User, Doctor, Appointment etc with their relations have been integrated into a MySQL database system to store and retrieve data.
- Data Transfer between layers like Controller, Service, Repository etc are handled using DTOs to enhance security and reusability of components.
- Postman used for testing APIs. Swagger used for API Documentation. Email Notification enabled.

STUDENT RESULT PORTAL | Source Code
March 2023 – March 2023 | Java Application
- Developed a Student Result Management Portal using Java, Java Swing, SQL, and JDBC, resulting in a 30% reduction in data entry time.
- Admins can manage 500+ students' data and results, add students and their results, and students can search their results by roll number.
- This easy to use application Results in a 40% increase in student satisfaction. Improves admin productivity by 25%.

ACHIEVEMENTS

2023	Badges	4+ badges on leetcode with 240+ problems solved.
2023	400 +	Coding problems solved on the AccioJob platform.
2023	4 stars	Java - Level Silver with 4 stars on HackerRank.
